Plant

Please Read Carefully Before Ordering

DISCOUNTS

Prices on Bulbs in this catalogue are net, as we have already reduced prices to the minimum. Our prices are not based on allowing (as a discount) extra bulbs of 5 to 20 per cent on orders amounting to a certain price as you will note in other catalogues. However, we give liberal overcount and valuable extras. The larger your order the more extras you will receive.

Orders will be discounted 20% if the purchaser will assume transportation charges. In this case do not include postage, as your order will be sent C. O. D. for these charges. **THIS OFFER DOES NOT APPLY TO COLLECTIONS OR VARIETIES THAT ARE OFFERED AT MORE THAN \$10.00 PER 100 FOR NUMBER ONE BULBS.**

Twenty-five or more bulbs may be had at the hundred rate; smaller lots add 10%; 500 bulblets at the 1000 rate. Three or more bulbs or bulblets at 10 rate, but no single item for less than 10 cents. Please be sure that each item ordered amounts to at least the above amount.

For the benefit of those who use bulbs in quantity such as jobbers and dealers, see pages 8 and 9 for wholesale prices.

TERMS

Net cash before shipment. A deposit of 25% will hold orders until Spring. Orders not fully paid will be sent C. O. D. at the time of shipment to your locality.

SHIPMENTS

Retail orders of \$2.00 or more prepaid anywhere in the United States or Canada. Eastern orders will be sent as soon as danger of frost is past. Orders of \$10.00 or more and Pacific Coast orders shipped anytime. Safe delivery to your express or postoffice guaranteed.

SALE CONDITIONS

Bulbs are offered for sale on condition that the variety is not sold out or planted at the time of receiving the order. Most of our stocks are fairly extensive, but there is a chance that a heavy demand will clean out a popular variety. In case any size is sold out we will substitute larger or smaller size unless told not to do so. Order early as possible to make sure that you get varieties and sizes desired.

NO WARRANTY

We give no warranty, expressed or implied, and will not be in any way responsible for the results of planting or forcing of any bulbs we send out. We guarantee all varieties to be true to name but will not be responsible for compensation beyond amount charged for any item in case of any error in this respect.

COLLECTIONS

On page 10 will be found our annual collection offers of the higher priced sorts. Look these over carefully as all are bargains. Select them yourself. We will meet prices of any reliable grower's collection offers if we have the stock you desire.

GRADED LOTS

An equal number of the first five sizes will be sold at the regular price of No. 3 bulbs. For instance, if you wish five bulbs of each of the above mentioned sizes, 25 in all, simply order as graded lot and pay for size three. If we are out of any certain size will fill to the best of our judgment. If all planted at same time, will insure you of longer blooming season.

BULBLETS

Of the new and higher priced varieties we furnish large hand-picked bulblets. When sold in bulk (commercial sorts), they will be field run. We do not guarantee bulblets to grow. Bulblets of some varieties grow readily, while others are rather poor germinators and need good care. Most varieties will not bloom until the second year. If you want to get into glads at a low cost, by all means buy bulblets.

CANADIAN ORDERS

Canadian customers must secure a permit to import bulbs from the Destructive Insect and Pest Act Advisory Board at Ottawa. We specialize in Canadian orders and carry Customs Declaration blanks at all times.

THRIP

Several years ago this pest caused untold damage. Thrip are easily controlled if proper precautions are taken. There is no reason why anyone should be bothered with this pest. First, buy clean bulbs that have been properly fumigated. If you are not sure they have been treated by the grower from whom you purchased, treat them with naphthalene flakes at the rate of 1 oz. to each 100 large or 250 medium size. Cover container, preferably a shallow box or tray, with newspaper. Perforate paper with small holes to allow excessive gas to escape. After three weeks sift out the flakes. The above treatment will kill both thrip and eggs. We do not recommend this treatment when the roots begin to show, as it will burn them and retard or stunt growth. Corrosive Sublimate (Bichloride of Mercury) is perhaps the best known dip. Corrosive Sublimate should be used at the rate of one oz. to 7½ gal. of water and the bulbs should be submerged from 8 to 10 hours. Corrosive Sublimate soluble in hot water. Dissolve thoroughly in a (glass) jar of hot water before putting into main container. Do not use a metallic container. Use wooden barrel or crock. Sack and label your bulbs, submerge as above stated. Corrosive Sublimate is a deadly poison, so great care should be taken with it.

Cultural Directions

The Way to Grow Good Glads

CARE OF NEW BULBS

When bulbs arrive, open package at once to admit air. If not wanted to plant soon, store in cool dry place. A fruit cellar is just right.

WHEN TO PLANT

When the trees native to your vicinity are unfolding their leaves, then all dangers of damaging frosts are past. From then until last of June.

WHERE TO PLANT

In beds, rows, borders, etc., and among other light-rooted plants. Plant in open sunny places not too near buildings nor close to foundations. Buildings shade and retard development or reflect strong sunlight and burn. Lack of free drainage, sunshine and aeration as well as ingredients in mortar make unfertile and sour soils. Keep away from trees and heavy-rooted shrubs especially.

KIND OF SOIL

A sandy loam is best. Works freely, retains moisture, and is productive. Any good garden soil will do but some require more work to keep loose, to keep weeds down, etc.

HOW TO PLANT

In spring at planting time, use only well rotted manures or commercial fertilizers. Spade not less than 8 or 9 inches deep. Open rows or trenches five inches deep, 18 or 20 inches apart. Set large bulbs in trenches the width of the bulbs apart. Further apart if you care to, but not closer. Small bulbs not so deep. Five inches is deep planting. Cover bulbs and ridge up the rows. If the soil is poor, cover only one inch then sprinkle liberally with sheep fertilizer or bone meal before covering and ridging. Firm down by walking on rows or with lawn roller to eliminate air pockets around the bulbs. If soil is dry when planted, water thoroughly after planting. If planted in beds set bulbs about six inches apart.

HOW TO MARK

Put in stakes and label each variety as planted. Use water-proof ink or lead pencil for marking labels. Common ink will fade from rains and watering.

CULTIVATING

Always keep soil loose and free from weeds. Never permit caking or crusting of soil after rains or watering. Keep cultivating. The more you do, the better your plants and flowers for many reasons.

FERTILIZING

If soil is poor, use plenty of sheep fertilizer, tankage or bone meal. All or each. Each has some content the other lacks. If soil is rich, use moderately when the spikes begin to show.

WATERING

Water when necessary, then soak them. Sprinkling has tendency to draw roots up for moisture. Send the water down to the roots. Unless very dry, once a week is usually enough.

BLOOMS

Cut flower spike when first bud is open. Keep in water, Change water and cut end of spike off slanting daily. Use knife for all cutting. Shears crush and close channels in stem so water cannot pass through to buds. In cutting spikes, leave 4 to 6 leaves on plant to mature bulbs.

DIGGING

Dig after October 1st but before heavy frosts. Do not wait until the leaves turn brown, dig early if you want good clean bulbs. Cut off foliage close to bulb. Dry in open air a few days but keep from frost. Keep each variety labeled.

STORAGE

Store in shallow wooden boxes or trays. Mark each container plainly. Store in cool, dry place. A temperature of about 40 degrees F. and humidity of 65 to 70 per cent is best.

REMEMBER

Good bulbs, plenty of sun, food, water and cultivating is all you need to raise prize winning blooms.

Choice Bulbs and Bulblets at Prepaid Prices

Three or more bulbs may be purchased at the 10 rate, but no single item less than 10 cents. If purchaser assumes transportation charges we will include extra bulbs of choice varieties (our selection) to more than cover these charges.

ALL STOCK OFFERED AND ORDERS ACCEPTED SUBJECT TO PRIOR SALE

"Help Yourself" Bargain Collection

PREPAID

For fans who desire small lots of newer and better varieties and for the grower who wishes to test these kinds, we offer the following (HELP YOURSELF) collection. We have selected only the leading varieties in a wide range of color. All bulblets medium to large. Each variety separately labeled. Because of the most favorable growing conditions in our fields the past season we are sure these offers can not be duplicated elsewhere.

Regular price each item is 50 cents. Example: 2 Large Amrita (one item); 3 Medium Amrita (one item); 5 Small Amrita (one item); 42 Blts. Amrita (one item). You may select not more than two of any item in any one collection.

New Introductions

RED LIGHTNING

(R. PRUITT-MAJESKI)

Here is a glad you will fall in love with at first sight. Color is a rich, deep scarlet. Lower petals are overlaid with a pleasing cream. The color combination is a great improvement over the well known Beacon. Opens five to seven medium size florets of good substance on a medium size straight spike. Does not fade or wilt in the hottest weather. Early. (75 days) Rapid propagator.

We have purchased entire stock from the originator but you may also procure stock from any of the following: Elmer Gove, Carl Salbach, G. A. Shaw & Sons and L. E. Weeks.

Large \$5.00 each; medium \$3.50;
small \$2.50. Bulblets 10 for \$4.00

OREGON STATE

(BONES)

A seedling of Picardy that carries all the characteristics of the latter variety. The basic color is likewise the same. The big improvement in this variety is the fact that it has dropped the muddy and streaky throat of its parent. Here is a throat that is a clear cream, adding to its great beauty. During the hot summer months we have compared this variety with its parent on many occasions and found that it opens one or two more florets and does not fade. Destined to become one of the most popular cut flower varieties.

Large bulbs only, each 50c;
3 for \$1.00; 12 for \$3.00
